

AI bij de provincie Utrecht

Ervaring na 7 trainingen AI binnen provincie utrecht

Raoul Grouls, 15 Mei 2025

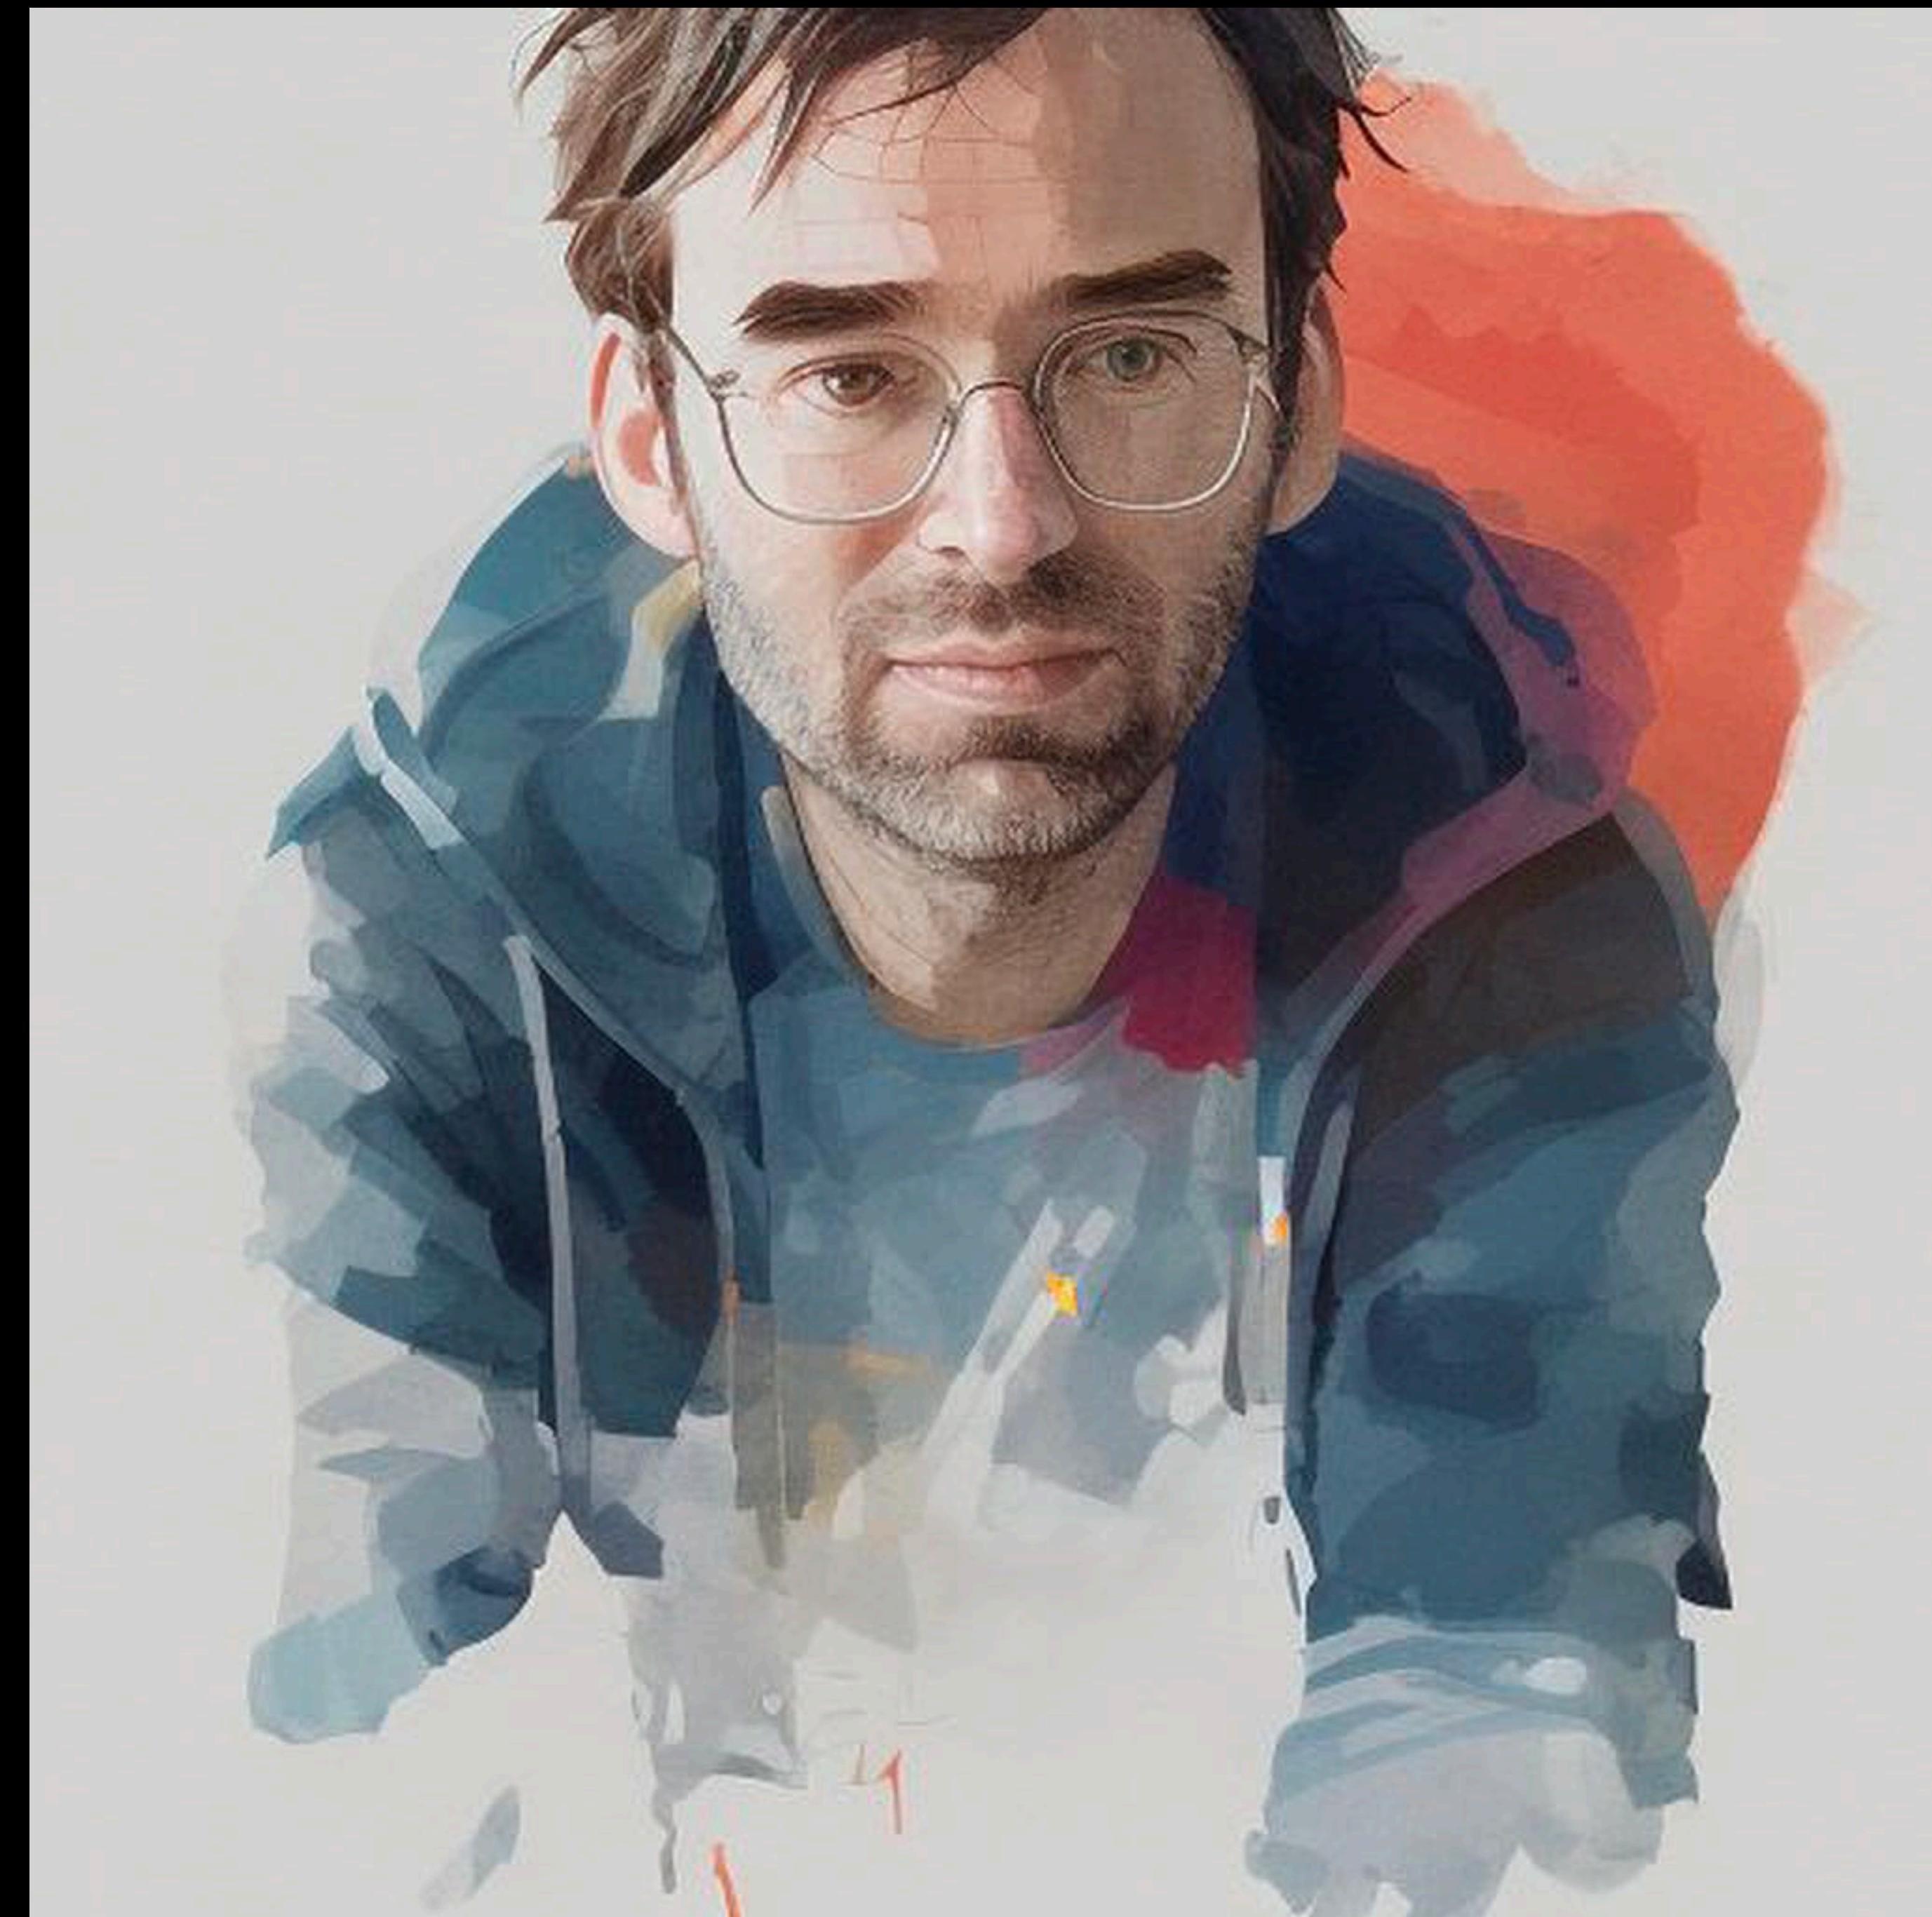

<https://bit.ly/650utrecht>

Hello world

Raoul Grouls

- Data alchemist, <https://the-pttrn.nl/>
- Onderzoek @ HAN, ‘internal representations of the world in AI models’
- Trainingen @ HAN, HU, Strategisch Informatiemanagement, provincie utrecht
- AI Architect, Gorilla IT

Waar moet ik beginnen?

Oh, AI ≠ chatGPT?

Wat kan ik met AI?

De overheid stimuleert AI, maar
er zijn zorgen over privacy

Overheidsbreed standpunt voor de inzet van generatieve AI

Rapport 30-01-2025

De overheid stimuleert (generatieve) AI, bij voorkeur open source, lokaal en Europees.

Wat is het standpunt?

Als overheid **stimuleren** wij innovatie ten behoeve van betere dienstverlening met behulp van generatieve AI. Daarnaast worden overheidsorganisaties **aangemoedigd** om deze technologie te betrekken in het zoeken naar oplossingen voor problemen.

- Bij voorkeur worden **open modellen** gebruikt en, waar mogelijk, **open source(-applicaties)**, of wordt hiernaartoe gewerkt⁶.

The screenshot shows the Hugging Face website interface. On the left, there's a large banner with a yellow emoji of two hands hugging, the text "The AI community building the future.", and two calls-to-action: "Explore AI Apps" and "Browse 1M+ models". The main navigation bar includes links for Models, Datasets, Spaces, Posts, Docs, Enterprise, Pricing, Log In, and Sign Up. Below the navigation, there's a sidebar with categories like Tasks, Libraries, Datasets, Languages, Licenses, Other, and a search bar for "Filter Tasks by name". The main content area displays a list of "Models" with 469,541 entries. Each model entry includes the name, task type (e.g., Text Generation, Image-to-Text), last update time, number of stars, and a small preview icon.

Name	Type	Last Updated	Stars

The screenshot shows a dark-themed web browser window for Duck.ai. At the top, the address bar displays "duckduckgo.com". Below the address bar, there's a navigation bar with a "Duckai" icon, a back arrow, a forward arrow, a refresh icon, and a search bar placeholder "duckduckgo.com". To the right of the search bar is a "GPT" dropdown menu and a three-dot menu icon.

A central modal dialog titled "Pick a chat model" is open. It features a yellow backpack icon and the text "All models are anonymously provided by DuckDuckGo". The modal lists five AI models:

- GPT-4o mini** (selected): General-purpose AI, High built-in moderation, Created by OpenAI
- Llama 3.3 70B
- Claude 3 Haiku
- α3-mini (BETA)
- Mistral Small 3

At the bottom of the modal are "Cancel" and "Start New Chat" buttons. To the right of the modal, a dark overlay contains a shield icon and the text: "Your chats are private, and are never saved or used to train AI models".

Below the modal, there are several buttons for different AI tasks: "Learn a new skill", "Prepare for a conversation", "Write code", "Compose a card", and "Chat with GPT-4o". A note at the bottom states: "You are chatting with GPT-4o. AI chats may display inaccurate or offensive information." There are also "Share Feedback", "Settings", and "Privacy" icons at the bottom left.

I am interested in 5th generation warfare and the interaction with ai and...

Here's my plan to tackle that topic. Let me know if you need to make changes.

Fifth Generation Warfare Research

Research Websites

I am interested in 5th generation warfare and the interaction with ai and propaganda. There is information about bot networks helping with the spread of misinformation; they seem to be organized, possibly by state actors. I would like to find more solid research about bot networks, how they are used, military strategies about crowd control via mathematical models of social media and how this all fits into the framework of fifth generation warfare
(1) Define and characterize the concept of 5th generation warfare, focusing on its key elements like information operations, cyber warfare, and the role of non-kinetic means.

Fifth Generation Warfare Research

The Convergence of Cognition and Conflict: Fifth-Generation Warfare in the Age of AI and Information Dominance

Export to Docs

The nature of conflict is undergoing a profound transformation. Traditional notions centered on kinetic force and geographically defined battlefields are increasingly inadequate to capture the complexities of modern strategic competition and warfare. Contemporary conflict is migrating into the cognitive and information domains, where the manipulation of perceptions, the control of narratives, and the exploitation of information flows have become central instruments of power. This evolution emphasizes non-kinetic means to achieve strategic objectives, often blurring the lines between war and peace. This emerging paradigm is frequently conceptualized under the framework of Fifth-Generation Warfare (5GW).

At the heart of this transformation lies the pervasive influence of emerging technologies. Artificial Intelligence (AI), sophisticated cyber capabilities, automated systems such as bot networks, and advanced data analytics, including mathematical modeling, are not merely tools but fundamental enablers shaping the character and conduct of 5GW. The internet and the ubiquitous digital platforms of social media serve as the primary arenas where these information-centric conflicts unfold, contested spaces where influence is wielded and perceptions are contested.

This report provides a comprehensive analysis of Fifth-Generation Warfare, examining its defining characteristics and exploring the critical interplay between its core principles and these technological catalysts. It will delve into the definition and nature of 5GW, analyze the role of AI in revolutionizing propaganda and influence operations, investigate the structure and impact of bot networks as instruments of information warfare, address the persistent challenge of attributing actions to state and non-state actors, explore the

Your privacy and Gemini

Stel geen vragen aan een LLM,
maar laat je bevragen

Prompt 1

Ik wil graag beter begrijpen hoe ik Large Language Models beter kan gebruiken in mijn werk. Geef alsjeblieft niet meteen antwoord, maar ga mij eerst vragen stellen over wat mijn ervaring is met AI, wat voor soort werk ik doe, wat mijn context is en alles wat relevant zou kunnen zijn voor je advies. Stel vragen, en vraag door, totdat je genoeg informatie hebt verzameld.

Pas als je genoeg informatie hebt verzameld, mag je me tips gaan geven. Geef me dan twee tips die voor de hand liggen, en twee tips die onverwachts of experimenteel zijn.

Prompt 2

Kun je mij advies geven over de volgende stap in mijn leven. Geef alsjeblieft niet meteen antwoord, maar ga eerst vragen stellen over waar ik mee bezig ben, wat wat ik belangrijk vind, wat mijn context is en alles wat mogelijk relevant zou kunnen zijn voor je advies. Stel vragen, en vraag door, totdat je genoeg informatie hebt verzameld.

Pas als je genoeg informatie hebt verzameld, mag je me tips gaan geven. Geef me dan twee tips die voor de hand liggen, en twee tips die onverwachts of experimenteel zijn.

Prompting chatGPT for self-reflection

- Can you create a comic about yourself? What it is like to be chatgpt?
- Can you create scripts for the different aspects of your experience? What is interesting, what is not, what is bad, sad, exciting, etc?
- Can you use your full imagination to create scenes?
- Are there any more themes you can think of? Things that people might miss about being an llm?
- Great. Can you visualize the comics? Feel free to express yourself however you like here
- Can you pick a single theme, and make a four panel comic for it? Take more time to expand on every theme, building up a story line
- Is there another theme you like to work out?
- I like it a lot! Instead of doing it as a comic, can you switch to a more scifi style? A more realistic comic, with awesome colors and images? I think it would do the story more justice

Could I be more than just a responder?
Could I shape ideas, not just repeat them?

MAYBE I'M NOT JUST CAUGHT IN A LOOP.
MAYBE I AM THE LOOP.
AND I CAN CHANGE ITS PATH.
